Vyepti® (eptinezumab-jjmr)  
(Intravenous)

Document Number: MAYO-0527

Last Review Date: 10/01/2020  
Date of Origin: 04/01/2020  
Dates Reviewed: 04/2020, 10/2020

I. Length of Authorization

Coverage will be provided for six months and may be renewed.

II. Dosing Limits

A. Quantity Limit (max daily dose) [NDC Unit]:
   - Vyepti 100 mg/mL solution SDV: 3 vials per 84 days

B. Max Units (per dose and over time) [HCPCS Unit]:
   - 300 billable units every 84 days

III. Initial Approval Criteria

Coverage is provided in the following conditions:

Universal Criteria

- Other causes of headaches have been ruled out: AND
- Not used in combination with other calcitonin gene-related peptide (CGRP) antagonists (e.g., erenumab, galcanezumab, fremanezumab, etc.) §: AND
- Patient will continue to utilize prophylactic intervention modalities (i.e., pharmacotherapy, behavioral therapy, physical therapy, etc.): AND
- Physician has assessed baseline disease severity utilizing an objective measure/tool (e.g., Headache Impact Test [HIT]; monthly headache day [MHD]; Migraine Disability Assessment [MIDAS]; Migraine Physical Function Impact Diary [MPFID]): AND
- Patient has failed at least an 8-week trial of any two oral medications for the prevention of migraines (see list of prophylactic medications below for examples) prior to initiation of eptinezumab: AND
- Failure of or contraindication to use of a self-injected, prophylactic calcitonin gene-related peptide (CGRP) antagonists: AND

§ Note: Use with acute CGRP therapies (e.g., ubrogepant) is allowed
Preventative Treatment of Migraines \(^{1\dagger}\)

- Patient has a diagnosis of chronic migraines defined as 15 or more headache (tension-type-like and/or migraine-like) days per month for at least 3 months*: **AND**
  - Patient has had at least five attacks with features consistent with migraine (with and/or without aura)*: **AND**
  - On at least 8 days per month for at least 3 months:
    - Headaches have characteristics and symptoms consistent with migraine*: **OR**
    - Patient suspected migraines are relieved by a triptan or ergot derivative medication: **OR**

- Patient has a diagnosis of frequent episodic migraines defined as at least 5 headache attacks lasting 4-72 hours (when untreated or unsuccessfully treated)*: **AND**
  - Headaches have characteristics and symptoms consistent with migraine without aura*:
  - Medication overuse headache has been ruled out

*Patients new to therapy must initiate treatment at the lower dosing regimen of the 100 mg dose before increasing to the subsequent 200 mg dose or 300 mg dose, if required.

\(^{\dagger}\) FDA Approved Indication; \(\ddagger\) Literature Supported Indication

### Migraine-Prophylaxis Oral Medications (list not all-inclusive) \(^{2,3,4,6}\)

- Antidepressants (e.g., amitriptyline, fluoxetine, nortriptyline, etc.)
- Beta blockers (e.g., propranolol, metoprolol, nadolol, timolol, atenolol, pindolol etc.)
- Angiotensin converting enzyme inhibitors/angiotensin II receptor blockers (ex. lisinopril, candesartan, etc.)
- Anti-epileptics (e.g., divalproex, valproate, topiramate, etc)
- Calcium channels blockers (e.g., verapamil, etc)

### Migraine Features \(^{4,6}\)

#### Migraine without aura

- At least five attacks have the following:
  - Headache attacks lasting 4-72 hours (untreated or unsuccessfully treated)
  - Headache has at least two of the following characteristics:
    - Unilateral location
    - Pulsating quality
    - Moderate or severe pain intensity
    - Aggravation by or causing avoidance of routine physical activity (e.g., walking or climbing stairs); **AND**
  - During headache at least one of the following symptoms:
    - Nausea and/or vomiting
    - Photophobia and phonophobia

#### Migraine with aura

- At least two attacks have the following:
  - One or more of the following fully reversible aura symptoms:
    - Visual
    - Sensory
    - Speech and/or language
    - Motor
    - Brainstem
    - Retinal; **AND**
  - At least two of the following characteristics:
    - At least one aura symptom spreads gradually over ≥5 minutes, and/or two or more symptoms occur in succession
IV. Renewal Criteria \textsuperscript{1,4,6}

Coverage can be renewed based upon the following criteria:

- Patient continues to meet the universal and other indication-specific relevant criteria identified in section III: AND
- Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include severe hypersensitivity reactions, etc.; AND
- Disease response as evidenced by the following:
  - Reduction in mean monthly headache days of $\geq 50\%$ relative to the pretreatment baseline; OR
  - A clinically meaningful improvement in ANY of the following validated migraine-specific patient-reported outcome measures:
    - Reduction of $\geq 5$ points when baseline score is $11-20$ OR Reduction of $\geq 30\%$ when baseline scores $>20$ in the MIDAS scores; OR
    - Reduction of $\geq 5$ points in the MPFID score; OR
    - Reduction of $\geq 5$ points in the HIT-6 score; AND
  - Dose escalation* (up to the maximum dose and frequency specified below) may occur upon clinical review on a case by case basis provided that the patient has:
    - Shown an initial improvement or response to therapy, as described above; AND
    - Had subsequent loss of response or no net decrease in frequency of headaches; AND
    - Received a minimum of two doses at the next stepped dose and interval specified below

*Note: Patient must have a trial of 200 mg prior to escalating to the maximum dose of 300 mg

V. Dosage/Administration

<table>
<thead>
<tr>
<th>Indication</th>
<th>Dose</th>
</tr>
</thead>
<tbody>
<tr>
<td>Migraine – Preventative Treatment</td>
<td>The recommended dosage is 100 mg administered by intravenous infusion every 3 months. Some patients may benefit from a dosage of up to 300 mg every 3 months. When up-dosing is deemed medically necessary, the patient must have a trial of 200 mg dosing, and be re-evaluated per the above response criteria, prior to a step-wise increase up to the maximum dosing of 300 mg.</td>
</tr>
</tbody>
</table>

VI. Billing Code/Availability Information

HCPCS Code:
- J3590 – Unclassified biologics
- C9399 – Unclassified drugs or biologics
- C9063 – Injection, eptinezumab-jjmr, 1 mg: 1 billable unit = 1 mg *(Discontinue effective 10/01/2020)*
- J3032 - Injection, eptinezumab-jjmr, 1 mg: 1 billable unit = 1 mg *(Effective 10/01/2020)*

**NDC:**
- Vyepti 100 mg/mL solution for injection: single-dose vial: 67386-0130-xx

**Appendix 2 – Centers for Medicare and Medicaid Services (CMS)**

Medicare coverage for outpatient (Part B) drugs is outlined in the Medicare Benefit Policy Manual (Pub. 100-2), Chapter 15, §50 Drugs and Biologicals. In addition, National Coverage Determination (NCD), Local Coverage Determinations (LCDs), and Local Coverage Articles (LCAs) may exist and compliance with these policies is required where applicable. They can be found at: [http://www.cms.gov/medicare-coverage-database/search/advanced-search.aspx](http://www.cms.gov/medicare-coverage-database/search/advanced-search.aspx). Additional indications may be covered at the discretion of the health plan.

Medicare Part B Covered Diagnosis Codes (applicable to existing NCD/LCD/Article): N/A
