Nucala® (mepolizumab)  
(Subcutaneous)

I. Length of Authorization

Coverage is provided for six months and is eligible for renewal.

II. Dosing Limits

A. Quantity Limit (max daily dose) [NDC Unit]:
   - 100 mg/mL single dose vial for injection: 3 vials every 28 days
   - 100 mg/mL single dose prefilled autoinjector or syringe for injection: 3 autoinjectors or syringes every 28 days

B. Max Units (per dose and over time) [HCPCS Unit]:
   Severe Asthma with an eosinophilic phenotype
   - 100 billable units every 28 days
   EGPA
   - 300 billable units every 28 days
   Hypereosinophilic Syndrome
   - 300 billable units every 28 days

III. Initial Approval Criteria ¹

Coverage is provided in the following conditions:

Universal Criteria ¹
- Must not be used in combination with another monoclonal antibody (e.g., benralizumab omalizumab, reslizumab, etc.): AND

Severe Asthma † ³,⁷,¹⁰
- Patient is at least 6 years of age: AND
- Patient must have severe* disease: AND
• Patient must have asthma with an eosinophilic phenotype defined as blood eosinophils \( \geq 300 \text{ cells} / \mu\text{L} \) within previous 12 months or \( \geq 150 \text{ cells} / \mu\text{L} \) within 6 weeks of dosing; \textbf{AND}

• Must be used for add-on maintenance treatment in patients \textit{regularly} receiving BOTH of the following:
  o Medium to high-dose inhaled corticosteroids; \textbf{AND}
  o An additional controller medication (e.g., long-acting beta agonist, leukotriene modifiers, etc.); \textbf{AND}

• Will not be used for treatment acute bronchospasm or status asthmaticus; \textbf{AND}

• Patient must have two or more exacerbations in the previous year requiring daily oral corticosteroids for at least 3 days (in addition to the regular maintenance therapy defined above); \textbf{AND}

• Baseline measurement of at least one of the following for assessment of clinical status:
  o Use of systemic corticosteroids
  o Use of inhaled corticosteroids
  o Number of hospitalizations, ER visits, or unscheduled visits to healthcare provider due to condition
  o Forced expiratory volume in 1 second (FEV\textsubscript{1})

\textbf{Eosinophilic Granulomatosis with Polyangiitis (EGPA)/Churg-Strauss Syndrome} \textsuperscript{†,5,6}

• Patient is at least 18 years of age; \textbf{AND}

• Patient has a confirmed diagnosis of EGPA\textsuperscript{§} (aka Churg-Strauss Syndrome); \textbf{AND}

• Patient must have blood eosinophils \( \geq 150 \text{ cells} / \mu\text{L} \) within 6 weeks of dosing; \textbf{AND}

• Patient has been on stable doses of concomitant oral corticosteroid therapy for at least 4 weeks (i.e., prednisone or prednisolone at a dose of 7.5 mg/day); \textbf{AND}

• Physician has assessed baseline disease severity utilizing an objective measure/tool (e.g., Birmingham Vasculitis Activity Score [BVAS], history of asthma symptoms and/or exacerbations, duration of remission, or rate of relapses, etc.)

\textbf{Hypereosinophilic Syndrome (HES)} \textsuperscript{†,11}

• Patient is at least 12 years of age; \textbf{AND}

• Patient has been diagnosed with HES for at least 6 months prior to starting treatment; \textbf{AND}

• Patient does NOT have non-hematologic secondary HES (e.g., drug hypersensitivity, parasitic helminth infection, HIV infection, non-hematologic malignancy) or FIP1L1-PDGFRα kinase-positive HES; \textbf{AND}

• Patient has a history of 2 or more HES flares within the previous 12 months (e.g., documented HES-related worsening of clinical symptoms or blood eosinophil counts requiring an escalation in therapy); \textbf{AND}

• Patient must have blood eosinophils \( \geq 1000 \text{ cells} / \mu\text{L} \) within 4 weeks of dosing; \textbf{AND}
- Used in combination with stable doses of at least one other HES therapy (e.g., oral corticosteroids, immunosuppressive agents, cytotoxic therapy, etc.)

**Components of severity for classifying asthma as severe may include any of the following (not all)**

- Symptoms throughout the day
- Nighttime awakenings, often 7x/week
- SABA use for symptom control occurs several times per day
- Extremely limited normal activities
- Lung function (percent predicted FEV₁) <60%
- Exacerbations requiring oral systemic corticosteroids are generally more frequent and intense relative to moderate asthma

---

**Eosinophilic Granulomatosis Polyangiitis (EGPA) defined as all of the following:**

- History or presence of asthma
- Blood eosinophil level > 10% or an absolute eosinophil count >1000 cells/mm³
- Two or more of the following criteria:
  - Histopathologic evidence of eosinophilic vasculitis, perivascular eosinophilic infiltration or eosinophil rich granulomatous inflammation
  - Neuropathy
  - Pulmonary infiltrates
  - Sinonasal abnormalities
  - Cardiomyopathy
  - Glomerulonephritis
  - Alveolar hemorrhage
  - Palpable purpura
  - Antineutrophil Cytoplasmic Antibody (ANCA) positivity

† FDA-approved indication(s); Ø Orphan Drug

### IV. Renewal Criteria

- Patient continues to meet the universal and other indication-specific relevant identified in section III: **AND**
- Absence of unacceptable toxicity from the drug. Examples of unacceptable toxicity include the following: parasitic (helminth) infection, herpes zoster infection, severe hypersensitivity reactions, etc.: **AND**

**Severe Asthma**

- Improvement in asthma symptoms or asthma exacerbations as evidenced by decrease in one or more of the following:
  - Use of systemic corticosteroids
  - Two-fold or greater decrease in inhaled corticosteroid use for at least 3 days
  - Hospitalizations
  - ER visits
  - Unscheduled visits to healthcare provider: **OR**
- Improvement from baseline in forced expiratory volume in 1 second (FEV₁)

**Eosinophilic Granulomatosis with Polyangiitis/Churg-Strauss Syndrome**
• Disease response as indicated by improvement in signs and symptoms compared to baseline as evidenced in one or more of the following:
  – Patient is in remission [defined as a Birmingham Vasculitis Activity Score (BVAS) score=0 and a prednisone/prednisolone daily dose of ≤ 7.5 mg]
  – Decrease in maintenance dose of systemic corticosteroids
  – Improvement in BVAS score compared to baseline
  – Improvement in asthma symptoms or asthma exacerbations
  – Improvement in duration of remission or decrease in the rate of relapses

**Hypereosinophilic Syndrome (HES)**

• Disease response as indicated by a decrease in HES flares from baseline *(Note: An HES flare is defined as worsening of clinical signs and symptoms of HES or increasing eosinophils (on at least 2 occasions), resulting in the need to increase oral corticosteroids or increase/add cytotoxic or immunosuppressive HES therapy).*

V. Dosage/Administration ¹

<table>
<thead>
<tr>
<th>Indication</th>
<th>Dose</th>

</thead>
<tbody>
<tr>
<td>Severe Asthma with eosinophilic phenotype</td>
<td>Pediatric Patients Aged 6 to 11 years (single dose vial only): 40 mg administered subcutaneously once every 4 weeks</td>
</tr>
<tr>
<td></td>
<td>Adults and Adolescents Aged 12 years and older: 100 mg administered subcutaneously once every 4 weeks</td>
</tr>
<tr>
<td>Eosinophilic Granulomatosis with Polyangiitis/Churg-Strauss Syndrome</td>
<td>300 mg administered subcutaneously once every 4 weeks as 3 separate 100-mg injections. Administer each injection at least 2 inches apart.</td>
</tr>
<tr>
<td>Hypereosinophilic Syndrome (HES)</td>
<td>300 mg administered subcutaneously once every 4 weeks as 3 separate 100-mg injections. Administer each injection at least 2 inches apart.</td>
</tr>
</tbody>
</table>

**Single dose vial must be prepared and administered by a healthcare professional**

VI. Billing Code/Availability Information

HCPCS Code:
• J2182 - Injection, mepolizumab, 1 mg: 1 billable unit = 1 mg.

NDC:
• 100 mg/mL single dose vial: 00173-0881-xx
• 100 mg/mL single dose prefilled autoinjector or syringe (cartons of 1): 00173-0892-xx

### Appendix 2 – Centers for Medicare and Medicaid Services (CMS)

Medicare coverage for outpatient (Part B) drugs is outlined in the Medicare Benefit Policy Manual (Pub. 100-2), Chapter 15, §50 Drugs and Biologicals. In addition, National Coverage Determination (NCD), Local Coverage Determinations (LCDs), and Local Coverage Articles (LCAs) may exist and compliance with these policies is required where applicable. They can be found at: [http://www.cms.gov/medicare-coverage-database/search/advanced-search.aspx](http://www.cms.gov/medicare-coverage-database/search/advanced-search.aspx). Additional indications may be covered at the discretion of the health plan.

Medicare Part B Covered Diagnosis Codes (applicable to existing NCD/LCD/LCA): N/A
